

Why Winspect doesn't tie you down to one equipment vendor

Question # 1

Q: Why does Winspect support so many different hardware manufacturers?

A: For many years, users of automated NDT systems have had to put up with the poor performance, obsolescence and bankruptcies of their equipment suppliers. We try very hard to give you choices. If one vendor goes bust or if you simply need higher performance, upgrade only the components in question. This keeps you productive and eliminates the need to retrain staff on a new system.

Question # 2

Q: Why does UTEX use system integrators?

A: One NDT company can never be strong in all industries. That's why we use system integrators that are experts in their respective fields such as aerospace, nuclear, composites, pipeline and on-line manufacturing. Our website provides a list of our system integrators. Your company will benefit in the long run from the stability that having choices brings.
