

With Winspect there's only one software package to learn

Question # 6

Q: I have several scanners and would like one software package to run them all. Can Winspect do it?

A: Yes. Since Winspect is not limited in the number or type of scanners it can run, you save time and money by training your staff on just one software package. This leads to improved corporate stability and output, making you less vulnerable to staffing changes.

Question # 15

Q: I don't know what I'm going to be inspecting in the future, can Winspect grow with my needs?

A: Certainly. With Winspect you will be extending what you already know. You will be able to develop, build or buy custom-built machines and make use of novel inspection techniques. Whether you use Ultrasonics, Eddy Current, Fluorescent Liquid Penetrant or any combination of these, Winspect will make it all happen.
